### Address

Yogyakarta, Indonesia

## About Me

Informatics undergraduate with hands-on experience in full-stack web development using React.js, Laravel, and MySQL. Built and deployed real-world projects including an e-commerce platform and a car rental system, both featuring responsive design and secure data management. Skilled in translating requirements into functional applications, optimizing user workflows, and collaborating effectively within teams.

## Skills

- Frontend Web Development
- Backend Web Development
- Database Design & Management
- API Testing & Documentation
- Git Workflow & Team Collaboration

## Tech Stack

- **Frontend:** React.js, Bootstrap, Tailwind
- **Backend:** Laravel (PHP), Node.js (basic)
- **Database:** MySQL
- **Version Control:** Git, GitHub
- **Tools:** Postman, Vercel, XAMPP

## Education

### Bachelor's Degree in Informatics

2022 – Present

Atma Jaya Yogyakarta University, Yogyakarta, Indonesia

GPA: 3.75/4.00

## Experience & Projects

### Linux Study Group

2022 – 2023

#### Member

Completed hands-on modules focusing on Linux command line interface (CLI), file system navigation, and basic shell scripting execution.

### Rental Jaya | [[Frontend Repo](#)] [[Backend Repo](#)]

2024

#### Car Rental Website

Created an online car rental system allowing customers to register, book vehicles, and view rental details while enabling admins to manage vehicle and booking data efficiently.

- Technologies: React.js (frontend), Laravel (API backend), MySQL (database)
- Implemented a user-friendly design and streamlined booking process to reduce customer wait times.
- Developed an admin dashboard to simplify data management and reduce manual entry errors.

### ReuseMart | [[Frontend Repo](#)] [[Backend Repo](#)]

2025

#### E-Commerce Platform

Developed a multi-role e-commerce website enabling customers, consignors, organizations, and staff to manage product listings, orders, and sales reports on a single platform.

- Technologies: React.js (frontend), Laravel (API backend), MySQL (database)
- Designed secure role-based authentication and an intuitive interface to speed up product listing and order processing.
- Delivered a responsive layout for seamless experience on both desktop and mobile devices.

### Personal Website Portfolio | [[Repository](#)]

2025

- Designed and deployed a personal portfolio website to showcase projects and skills to potential employers and collaborators.
- Technologies: React.js, Bootstrap, Vercel Hosting
- Ensured fully responsive design for optimal viewing on both mobile and desktop.
